SofTec Solutions offers tailored security solutions to protect vital organizational information. We stand ready to bring our years of combined experience in the Information Technology and security industries to focus on the issues facing your organization. We believe that having a well-designed Enterprise Security Architecture (ESA) in place positively contributes to your company's bottom line.

Consulting companies that project the "one size fits all" approach try to shoehorn their software product set into your company's environment. This is because many of these companies have reseller agreements with security hardware and software vendors. SofTec takes a different approach. We do not sell security hardware or software and we do not believe in entering into any reseller agreements with any security hardware or software vendors to push their products and services. Instead, SofTec believes in remaining independent so we can offer suggestions as to which hardware and software provides the best solution for the problems in your environment based upon our real world experience and expertise in the data security business.

The cornerstone of our approach is the SECUREPLAN security assessment. SECUREPLAN is a detailed assessment methodology that covers six major areas of your security posture. These areas are:

- Organization
- Documentation
- Education
- Network Protection
- Incident Response
- Security Management

By assessing your security posture in these six areas SofTec can build a complete picture of the overall effectiveness of the security measures in place. This then allows us to make informed and knowledgeable recommendations as to what additional steps maybe necessary to insure that an effective ESA is deployed.

Let SofTec help you build an Enterprise Security Architecture that is right for your business so you can provide your company with protection for your critical information assets.

Client Testimonials:

"I would not have any reservations about soliciting SofTec for future projects that are critical and demanding. SofTec places quality people and treats their employees well. As a result, I have people who are happy to work for SofTec and put forth the extra effort to produce quality work."

TSgt Jermaine Johnson, Technical Project Manager, Buckley AFB

"Please accept my thanks and gratitude for the talented individuals SofTec has provided to the Comcast Media Centers for the past 15 months. The quality of skills brought to our IT endeavors has been nothing short of outstanding."

J. Capps, Comcast

"Digital Lighthouse recognizes SofTec Solutions for setting the standard and distinguishing themselves from their peers. SofTec Solutions demonstrates a shared vision...for excellent performance, innovative approaches, and customer satisfaction."

T. Mack, Program Manager, Digital Lighthouse
